### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: None of the prior art of record alone or in combination teaches or fairly suggest applicant's claimed invention. Particularly, in independent claim 1, applicant claims among other things "wherein said camera captures images at periodic intervals and said LEDs are periodically activated to emit light during those intervals when said camera is not capturing images" which is not taught or suggested by the prior art of record.

In independent claim 12, applicant claims among other things "a camera for capturing images for display of the images to a vehicle operator, wherein said camera captures images at periodic intervals and said first light source is periodically activated to emit light during those intervals when said camera is not capturing images, and wherein said second light source is activated at periodic intervals coinciding with those intervals at which said camera is capturing an image" which is not taught or suggested by the prior art of record.

In independent claim 40, applicant claims among other things "a control circuit for preventing activation of said first LEDS during those intervals when said camera is capturing images, and for activating said second LEDS at least during those intervals at which said camera is capturing an image." which is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
